GLASEL MAIL NEWS vol.0244

Low-profile powder container that can come with a flexible mesh inside lid.

LAMI

POWDER

with bottom plate

without bottom plate

- The body comes either with or without a bottom plate according to your choice. The bottom plate can be colored differently from the body.

Vacuum tray(PET)

- The PET sealer prevents the puff from being excessively exposed to the powder while carrying the container.

Options(for the flexible mesh inside lid)

- The seal prevents the puff from being exposed to the powder before the seal is removed.
- Any image can be printed on the seal.*The photo shows an image of general specifications.
- The tab of the seal is T-shaped for easy removal.

Inside lid seal(paper)

Flexible mesh inside lid

- A flexible mesh is used for the planar area of the inside lid. The bottom can be reached by pressing a puff against the inside lid. It eliminates the need to turn over the container to put powder on the puff, and helps adjust the amount of powder that it used.

品名	内容量 (mL)	嵌合方法	ボトルサイズ		材質	キャップ		中蓋	
			SIZE (mm)			品名	材質	穴数	穴径
PRODUCT NAME	CAPACITY	METHOD OF JOINT	H	W1	MATERIAL	PRODUCT NAME	MATERIAL	NUMBER OF HOLES	HOLE DAIAMETER
LAMI	30	Screw	26.2	77.1 φ	AS	AMAN-120CAP	PP	Flexible mesh inside lid	

● Please note that the specifications are subject to change.

● The capacity and bottle size figures are standard values (before decoration and in a standard color), which may differ from measurements.

● The table shows the capacity up to the inside lid (with the inside lid set).

● The height is for the jar only.
